Source development and nonoverlapping blocks

10 s native record · descriptive only

Actual samples 2.0000–10.0000 s; fs = 1600.000 Hz; Hann 2.000 s, 50% overlap.

2 s block spread is descriptive, not physical uncertainty; incomplete tail is excluded from blocks.

Unvalidated loading-analogy prediction · short record; no stationarity claim
